

TRANSMITTING PRINTING FILES

We would ask you to prepare the data in one of the following formats (PC or MAC) so that your printing data can be processed properly:

Screen printing

Formats: Adobe Illustrator AI, Adobe Illustrator EPS (vectorized)

Fonts: Please make sure to change all fonts into paths (vectorized)

Colors: The colors used for screen printing are non-transparent inks. Their color values must be designated with a Pantone number.

Digital printing

Formats: Adobe Illustrator EPS, Adobe Illustrator AI, Print PDF X1, TIFF

Fonts: Please make sure to change all fonts into paths (vectorized)

Colors: The colors used for digital printing are transparent inks that are defined in your document in the CMYK / Euro scale

- We would ask you to save open files in Adobe Illustrator AI or EPS format exclusively.
- Please check the resolution of your printing file in the size 1:1.
- In addition, please save your files in the CMYK color mode without incorporating color profiles.
- On request, we supply suitable printing templates for designing tent roofs and side walls.
- Please send your printing data (approx. 3-4 MB max.) by e-mail to: info@pro-tent.ch
- If you have larger data volumes, please contact us so we can give you the address of our FTP server or send your files by a transfer provider (WeTransfer).
